- Stainless steel trim tab blades (2)
- 20' actuator extension harnesses (2) with Deutsch connectors
- Upper mounting bracket with gland seal
- Lower mounting bracket
- All stainless steel mounting hardware
- Available in standard mount and edge mount (space saver)
- **Switches sold separately**

We make the best boats better!™

Trim tabs make the single most important difference in the way your boat rides and performs. They are optional on some boats but should be as standard as power trim and tilt. Lenco trim tabs make your boat ride smoother, drier, faster and with increased safety whether on a small skiff or a mega-yacht. Lenco's ballscrew design is more reliable, three times more powerful and features an instant response, which makes them very user friendly compared to typical hydraulics. We also like being oil-free and environmentally conscious.

- Instant response electric actuators for precise control
- Everything is fully submersible, maintenance-free and sealed for life
- Self-locking ballscrew will not drift, even while backing down
- 12-gauge (2.6 mm) laser cut stainless steel trim tab planes
- Stainless steel rams stand up to any sea conditions
- High-impact corrosion-proof mounts look great through years of abuse
- Clean, time and space-saving installation
- Sizes available to fit any boat with 12- or 24-volt actuators

42'-79'	12.80-24.07	12" x 40"	15012-101

Size Chart

In the tab size:

- First number represents tab length
- Second number represents tab width at hinge
- E = Edge Mount
  The actuator mounts at the trailing edge of the plane, requiring 4" (10.16 cm) less transom height than our standard mount
